

# Use of nail guns for fixing trussed rafter bracing

(Withdrawn – January 2024)

The Technical Guidance Notes are produced by NHBC as guidance solely for our builder customers as to how to interpret the technical requirements in relation to the warranty cover provided by NHBC under its Buildmark, Buildmark Choice, Buildmark Link, Buildmark Solo, Buildmark Connect or any similar product from time to time. It has not been created or intended for distribution or use outside of that purpose. The information contained in this Technical Guidance Note does not constitute advice and is not to be relied upon by any third party. Nothing in this Technical Guidance Note is intended to, nor should it be taken to, create any legal or contractual relationship. Any third party who chooses to rely upon the information contained in the Technical Guidance Notes shall do so entirely at their own risk and NHBC accepts no duty of care or liability, however caused, in connection with its use or reliance by any third party.

## Question

The gauge of the nails used in nail guns is less than that quoted in the NHBC Standards. Can these be used for fixing trussed rafter bracing?

## Considerations

- NHBC Standards clause 7.2.9 asks for 3.35mm (10 gauge) x 65mm long galvanised nails – nails used in nail guns are not available to this specification.

## Answer

When nail guns are used, 3.1mm x 75mm long annular ring-shank nails are acceptable. They do not need to be galvanised.

**NHBC, NHBC House, Davy Avenue, Knowlhill, Milton Keynes, Bucks MK5 8FP**
