

Wiring to wall lights

(Withdrawn – January 2024)

The Technical Guidance Notes are produced by NHBC as guidance solely for our builder customers as to how to interpret the technical requirements in relation to the warranty cover provided by NHBC under its Buildmark, Buildmark Choice, Buildmark Link, Buildmark Solo, Buildmark Connect or any similar product from time to time. It has not been created or intended for distribution or use outside of that purpose. The information contained in this Technical Guidance Note does not constitute advice and is not to be relied upon by any third party. Nothing in this Technical Guidance Note is intended to, nor should it be taken to, create any legal or contractual relationship. Any third party who chooses to rely upon the information contained in the Technical Guidance Notes shall do so entirely at their own risk and NHBC accepts no duty of care or liability, however caused, in connection with its use or reliance by any third party.

Question

Is it acceptable at completion of a dwelling for electrical cables for wall lights to be left protruding through the wall with just a covering of insulation tape?

Considerations

- NHBC Standards clause Chapter 8.1.7 states that lighting outlets should be provided in each room, hall, landing and staircase. Wall lights are often provided in addition to the main light in a room and are sometimes left as an option for the homeowner to fit their own choice of fitting after occupation.
- Insulation tape can be easily removed exposing live cables, which would become a hazard.
- BS 7671 'Requirements for Electrical Installations' clauses 526.5 and 559.6.1.1 refer to lighting points and a requirement for their termination to be in a suitable accessory or enclosure. Use of insulation tape, with or without connection blocks, does not comply with the electrical requirements.

Answer

Where electrical cables are provided for homeowners to fit their own fittings after occupation the cables should be either terminated in a:

- suitable proprietary electrical enclosure complying with the appropriate British Standards e.g. recessed back box with cover, or
- temporary light fitting e.g. batten lampholder.
